PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in software development, databases, web technologies, and problem solving. Skilled in Python, C/C++, Java, JavaScript, React, Node.js, SQL/NoSQL databases, and backend/API development. Familiar with DevOps, CI/CD, Docker, Linux, machine learning, and cybersecurity, with strong communication, teamwork, and event-management experience.

TECHNICAL SKILLS

- **Languages:** Python, C, C++, Java, JavaScript, SQL
- **Web & Backend:** HTML, CSS, React, Node.js, Django, FastAPI, REST APIs, Web Development
- **Databases:** MySQL, PostgreSQL, MongoDB, Redis, DBMS
- **CS Fundamentals:** Data Structures & Algorithms, OOP, Problem Solving, Cryptography, Cybersecurity
- **DevOps & Tools:** Git, GitHub, Docker, Linux, CI/CD, DevOps, VS Code, Figma
- **Other:** Machine Learning, Creative Writing

EXPERIENCE

Events Lead – Hackshastra

- Led planning and execution of technical events, coordinating cross-functional teams, timelines, logistics, and responsibilities.
- Supported technical initiatives and ensured smooth event delivery through effective communication and teamwork.

Former Events Lead – Centre of Drone Technology (CDT)

- Organized technical workshops and events focused on drone technology and collaborated with teams to increase participation and engagement.

EDUCATION

B.Tech. in Computer Science & Engineering – SRM University, AP | CGPA: 8.50 | Aug 2024 – Present

Relevant Coursework: Data Structures & Algorithms, OOP, Database Systems, Algorithms, Full Stack Development

KEY PROJECTS

- **Integrated War Resource & Battlefield Medical Management System:** DBMS-based system for resource tracking and battlefield medical operations using MySQL, 3NF normalization, joins, triggers, and transactions, with Node.js/Python backend and basic frontend.
- **Student Counselling Management System:** MERN-stack web application for student counselling bookings, counsellor scheduling, and admin monitoring with role-based access control. Ongoing project.
- **Expense Tracker:** Python application using JSON file handling for adding, searching, updating, deleting, and summarizing expenses by month and category.
- **Student Record Management System:** C-based management system using file handling, authentication, role-based access, and CRUD operations for persistent student records.

HACKATHONS & PARTICIPATION

- Changethon – IIT Roorkee
- MSME Ideathon
- Robo Wars – V.R. Siddhartha College
